Application for Full Stack Developer Role – Enterprise Application Delivery, Global IT

Dear Hiring Team at Milestone Systems,

I am writing to express my keen interest in the Full Stack Developer position within the Enterprise Application Delivery department at Milestone Systems. As a soon-to-be graduate with an AP Degree in Computer Science (expected June 2025), I am excited about the opportunity to contribute to a forward-thinking team focused on delivering modern cloud-based solutions.

During my studies, I have gained solid experience in backend development using technologies such as .NET, C#, and RESTful APIs. I have also worked with front-end tools like Vue.js and JavaScript on both school projects and internships. My academic training has given me a good understanding of software architecture, object-oriented design, and agile methodologies.

What excites me most about this role is your focus on Azure Serverless architecture and building scalable, secure, and cloud-native applications. I am eager to develop deeper expertise in Azure Functions, Logic Apps, and DevOps practices, and I am willing to take extra certifications or training to bridge any remaining gaps. I see this role as a unique opportunity to combine my technical background, passion for modern technologies, and strong motivation to grow professionally.

From my internship at Royal Unibrew, I gained valuable experience collaborating in cross-functional teams, developing internal tools, and writing clean, maintainable code. This has strengthened my communication skills and my ability to contribute effectively in a professional environment.

I am particularly drawn to Milestone Systems' values of empowerment, growth, empathy, passion, and responsibility. These align closely with my personal values and the type of culture I seek to be part of. I believe my eagerness to learn, proactive mindset, and commitment to high-quality development would make me a strong fit for your team.

Thank you for considering my application. I look forward to the possibility of joining Milestone Systems and contributing to your exciting projects.

Yours sincerely,
Elvis Ndum Mbah
